

## Gym ChatBot

### Program Feedback

The program was very helpful to me and I also gain skills like creating chatbot under experienced mentors . I had an amazing learning experience as an intern in Edunet Foundation.

### Project Short Summary

I created a gym and fitness chatbot to enhance member experience through technology. One effective solution is the implementation of a gym chatbot that can provide instant responses and assistance to members and potential clients. This chatbot will address common queries and facilitate various processes, such as understanding fee structures, getting diet and workout plans, hiring personal trainers, and applying to become a personal trainer.
